<b>1</b>	<b>GENERAL REQUIREMENTS</b> .....	<b>3</b>
<b>2</b>	<b>SCOPE</b> .....	<b>3</b>
<b>3</b>	<b>TECHNICAL REQUIREMENTS</b> .....	<b>3</b>
3.1	EFFICIENT USE OF RADIO SPECTRUM.....	3
3.2	ELECTROMAGNETIC COMPATIBILITY.....	4
3.3	HEALTH AND SAFETY .....	4
3.4	ADDITIONAL ESSENTIAL REQUIREMENTS .....	4
3.5	VALIDITY OF STANDARDS .....	4

TS RE 030, Version 1.0

## 1 General requirements

Technical specification has been prepared and approved by the Telecommunications Regulatory Authority (TDRA) based on the Telecommunication apparatus Type Approval Regime.

Several technical specifications may apply to the equipment. If equipment within the scope of this technical specification also incorporates functions that are covered by another technical specification, the relevant technical specification is applied to each function separately. The influence of one function on the other is taken into account.

## 2 Scope

This technical specification applies to 5 GHz high performance RLAN and ancillary equipment. This technical specification defines minimum technical requirements for health and safety, electromagnetic compatibility, efficient use of radio spectrum and additional essential requirements based on the Telecommunication apparatus Type Approval Regime.

Unless the context requires otherwise, the expressions and wordings appearing in the Telecommunication apparatus Type Approval Regime shall have the same meaning described thereto.

## 3 Technical Requirements

### 3.1 Efficient use of radio spectrum

The equipment shall comply with allocated frequency bands given in the National Frequency Allocation Table (NFAT), UAE 22 and the TDRA regulations - Use of 2,4 GHz and 5,8 GHz bands for WLAN and RLAN.

The equipment shall meet the requirements of following standard(s):

EN 301 893      Broadband Radio Access Networks (BRAN); 5 GHz high performance RLAN; Harmonized EN covering the essential requirements of article 3.2 of the R&TTE directive.

TS RE 030, Version 1.0

### 3.2 Electromagnetic compatibility

The equipment shall meet the requirements of following standard(s):

- EN 301 489-1 Electromagnetic compatibility and Radio spectrum Matters (ERM);  
Electromagnetic Compatibility (EMC) standard for radio equipment and  
services; Part 1: Common technical requirements.
- EN 301 489-17 Electromagnetic compatibility and Radio spectrum Matters (ERM);  
ElectroMagnetic Compatibility (EMC) standard for radio equipment; Part 17:  
Specific conditions for Broadband Data Transmission Systems.

### 3.3 Health and safety

The equipment shall meet the requirements of Technical specification TS HS 001.

### 3.4 Additional essential requirements

A licence must be obtained before equipment of this type can be used.

### 3.5 Validity of standards

If no issue or revision number is quoted along with the title of a standard, the valid edition should be used. The valid of the standard can be checked on:

- For EN standards:
